

MINIM

FEATURE BENEFITS

General: The **MINIM** is a 24 fader digital lighting desk targeted at the small to medium sized theatrical shows. It offers both manual and memory operation and is a great “learning” desk for the educational, worship, rental and small theatre sectors of the market. Enough power within to allow the advanced user to create more complex shows – concurrently running multiple scenes and sequences.

Flash Button for every fader – plus flash level master and Add or Kill mode.

Battery backed memory – stores all recorded memories when power is turned off. Returns to last known state when power is switched on.

Uncluttered, easy to use layout with dedicated function buttons and faders – no menu driven system!

Robust, ergonomic design with rubber side bumpers – *no plastic!*

Compact size suitable for desk top or 19” equipment rack mounting.

All faders have integral dust covers – *longer life and smoother operation.*

Grab Master. Frees up channel faders for creation of next look.

Up to 13 memories can be played simultaneously.

Lower fader bank can run in three different modes –

- Second Preset Bank (Preset Mode)
- Extension to first Preset Bank, ie. 13-24 ch. (Wide Mode)
- Memory Playback Masters (Scene Mode) to playback Scenes and Chases

Front lip rolled to form clever carry handle – lightweight 5kgs

Port for saving and loading up to 4 separate show files, also doubles up for uploading new software into the **MINIM**

1/4” jack for connecting remote switches or trigger devices – *can run without an operator!*

Integral switchmode power supply, selectable between 80-130 VAC and 190-260 VAC input voltages.
*No external plugpaks required!
 No flimsy DC sockets and plugs!*
